RE: Mechanical Integrity Tests - Injection
Wells Nos. 5 and 6 (UIC Permit No.
UTU300001)

Dear Mr. York:

Thank you for your January 5, 1993 submittal of the results of the December 2-3, 1992 mechanical integrity tests on injection wells Nos. 5 and 6. After review of the radioactive tracer test well logs and the logger's reports, it is our opinion that injection wells Nos. 5 and 6 have no significant leaks in their casings and no significant fluid movement into an USDW through vertical channels adjacent to their well bores. The referenced tests are hereby approved as proof of mechanical integrity for wells Nos. 5 and 6.

If you have any questions, please call Jerry Jackson at 538-6146.

Sincerely,

Utah Water Quality Board

Don A. Ostler, P.E.
